

# CARLOS DIAZ

---

“My work presents urban scenes, realist landscapes. My paintings often encompass broad visions, treated with bright lights (light is always the main concept) and where the human figure plays a little significance.”

- Carlos Diaz

---

Barcelona , 1968.

The painter from Barcelona is one of the most distinguished artists from the new generation, who cultivates the realism from a contemporary optics. His work has been exhibited internationally in galleries of Europe and different fairs of art, obtaining a great success. He has been selected in a collective sample of Spanish realism in the prestigious Panorama-Museum in Bad Frankenheuse (Germany).

In his works the light and the chiaroscuro are protagonists of the elaborated compositions. He impregnates beauty in the objects, places and forms, that happen unnoticed for all day after day. The fronts, street furniture, vehicles, and the sea ...

are the usual themes of his work. The absence of the human presence is also a point of his work that enlarges the small moments.
