

CARLOS MORAGO

"He has gone from selling his works in Madrid's Rastro, to exposing in sober galleries. All this without losing an air of modesty that allows him to speak of his technical limitations, patiently overcome to perfect his impressionistic realism. "

- El País

Madrid, 1954

Carlos Morago was born in Madrid in 1954. He is a Spanish contemporary painter, academic of the Royal Academy of Fine Arts, known for highly realistic work, is supported by an extensive resume of solo exhibitions, group as well as prizes. His presence in both national and foreign galleries has been usual since 1980. He has received awards such as the medal of Honor of medal awards BMW (Autumn Salon Room Macaroon).

His work is characterized by the economy of visual instruments. Morago consciously limits the images to a minimum of details just to convey an atmosphere of peace and tranquility. His creations, with lonely sites, are abandoned and have an irresistible tendency to silence, peace, full of illuminations and touches of white. This sensitivity to details , hidden corners and unknown places, expressed through a painting that many define as hyperealist, are the ones that have given to Morago a well deserved reputation that precedes it. The artist has been sponsored by the Art Gallery Anquin 's in international art fairs.
