**All his paintings depart from a solid structure and a balanced composition that transmits his harmony and beauty, but also they want to count histories and to create sensations to the spectator. Frank Jensen paints what is essential. His aim is to realize a reflexive and honest work. The artist can find the inspiration in a fragment of wall, in the combinations of forms, in the symbols, the light, the people, in a political or social fact, in a poem or simply in some motive that comes back to his mind.**
