

JESÚS CURIÁ

" Jesus Curiá's sculptures always surprise thanks to the incredible force that he transmits to them. He plays with the different possibilities that the human figure offers when he combines it with a multitude of materials to stamp on the final work a powerful dramatic quality full of fantasy and mystery. "

- Estrella Villatoro.

Madrid, 1969

He was licensed in Madrid for the U.C.M in 1992 and doctorates in 1995. Teacher Volumen Universidad Francisco of Vitoria from 2009. This young sculptor investigates and shows the human body by means of the bronze combined with wood, stones, irons with rusty patinas or with the simple air. His work goes beyond the imagination. They are works that surpasses the material and show themselves reflexive, remembering big myths like Ícaro or Helicoide: figures that ponder, juvenile interlaced bodies, the figures that penetrate the solid material or that are on the verge of rising over us. These figures appear with ethnic, strong and agile features that do of his work a contemplative experience and of great depth.

His work is distributed all over the world, you can find in in places like the Sungsan Art Hall (South Korea), Fondos del Museo Tiflológico of the O.N.C.E., Funds of the Art heritage of the C.A.M., Funds of the Art heritage of the U.C.M between other places.

Jesus Curià is one of the most international artists that we have. It has exhibited in multiple countries and international fairs as in Singapore Art Stage (Singapore), Art 14 London (England), Art Karlsruhe y St-ART with
